

Investing in Transportation

Monty W. Fredrickson, P.E.
Director – State Engineer

On behalf of Nebraska's transportation agency and our partners – Nebraska's highway associations, its diverse transportation industry, its state, regional and community commerce, development, tourism and safety entities, and its citizens – all of us who value and depend on our state's highway system: *Thank you* to Nebraska Lawmakers.

Last year's Build Nebraska Act, introduced and championed by Senator Fischer, endorsed by 72 percent of the Nebraska Unicameral and signed by Governor Heineman, is poised to foster growth and progress across the state. The Build Nebraska Act will allow much needed and long awaited capital improvement projects to begin as soon as Fiscal Year 2014.

This Program Book for 2013-2018 does recognize that Nebraska transportation faces uncertainties in funding and other challenges. We at the Nebraska Department of Roads continue to study, evaluate, reevaluate and plan as strategically as possible. We strive to deliver the best value for the public's investment in safe, reliable and affordable transportation.
